Food safety, work safety, waste management

Social Farming

- **Horizon Project**
 - **“Agroliberi II: opportunità di occupazione in aziende agricole di disagiati mentali”**

"Agroliberi II (Countryfrees?): employment opportunities on farms of mentally disadvantaged" "

Agroliberi

- CIA Toscana at the end of the '90s promoted the project "agro free", under the Community Initiatives "Horizon". The project involved a number of psychiatric patients with major difficulties of social and labor integration, with the aim of making these people take specific professional skills and give them some business opportunity

In Tuscany, according to data from the Tuscany Region about two years ago, farms working in the social farming, are more than 150. These farms work with different types of disabilities: psychiatric patients, persons with disabilities, drug addicts and alcoholics, people from prisons, retired, kids, refugees

Creating a model for social farming:
with the University of Pisa we are
carrying out work to define the
organizational standards of social
services for agriculture that can foster
the integration between the agricultural
world and the world of health

In Italy we have a national law about
Social farming, also a Regional law;

Priority in funding and special measures
from the Rural Development Plan;

Recognition of social farming not only in
agriculture but also in socio-regional
health system

CIA TOSCANA IN EUROPEAN PROJECTS

**CIA TOSCANA PARTICIPATED
IN MANY EUROPEAN PROJECTS
CONCERNED WITH AGRICULTURE,
